Private Water Well Testing

Bremer County will test your private well water. *It's easy and it's free.*

Call in or stop in the **Building and Zoning Department** and set up an appointment for us to come out and take a water sample, we will send it in and then send you the results. The water test checks for:

Nitrates - Coliform Bacteria (E Coli) - Coliform Bacteria (Total)
Arsenic (Total) and Manganese (Total)

We will need from you the following information:

1. The year of construction and type.
2. The casing diameter and material it's made of.
3. The depth of the well.

Private Abandon Well

In 1989 a well abandonment program began where private well owners voluntarily plug their own abandon wells. But on July 1, 2000, State law required that all abandoned wells be properly plugged.

If you have an abandon well on your property, Bremer County will help pay up to

\$500.00

to have it plugged.
Call a well plugging contractor now to have your abandon well plugged.

Private Well Rehabilitation

Call to set up an appointment to see if your well qualifies for a rehabilitation.

This would included eliminating the pit and bringing the casing up to above grade.

Bremer County will pay up to

\$1,000.00

to have your well rehabbed if it qualifies.

Call a well contractor today.
